

Moinak Ghosh

(+91) 9560293226 — ghoshjimoinak@gmail.com — LinkedIn — GitHub — Portfolio

SUMMARY

Frontend Developer specializing in React, experienced in building scalable and responsive web applications, integrating APIs, and developing user-centric interfaces; with foundational knowledge of backend technologies (Node.js, Express).

EXPERIENCE

AIML Project Intern

September 2025 – November 2025

Infosys Springboard (Virtual Internship 6.0)

Remote

- Architected and delivered **SentinelNet**, an AI-Powered Network Intrusion Detection System (NIDS), developing an end-to-end **Streamlit dashboard** with real-time visualization and monitoring capabilities.
- Integrated **5 machine learning models** (Random Forest, SVM, Logistic Regression, Isolation Forest, K-Means) to enable multi-class intrusion detection on the **CICIDS dataset** (10,000+ records).
- Performed EDA, feature engineering, and **PCA-based dimensionality reduction**, improving model efficiency and enhancing visualization clarity using **Plotly dashboards**.

PROJECTS

Durlassa – Women Safety Application

MERN Stack (Frontend-focused), GPS APIs

- Built a safety application featuring **real-time GPS tracking**, SOS alerts, and route-safety analysis; developed **core frontend using React** and collaborated on backend integration.
- Designed responsive UI components supporting **multiple screen sizes**, optimizing user experience and ensuring smooth interaction during emergency scenarios.

SentinelNet – AI-Powered Network Intrusion Detection System

Python, Streamlit, Scikit-learn

- Developed an ML-based NIDS dashboard integrating **5+ models** for real-time threat detection, with interactive **Plotly visualizations** for monitoring network anomalies.
- Processed and analyzed large-scale network data (**10,000+ records**), performing feature selection and model evaluation to improve detection performance and reduce false positives.

My Portfolio Website

React, Tailwind CSS, JavaScript, Three.js

- Designed and developed a fully responsive portfolio with **modern UI/UX**, showcasing projects and skills with optimized performance and accessibility.
- Implemented dynamic sections, animations, and smooth navigation, improving user engagement and ensuring cross-device compatibility.

EDUCATION

Bachelor of Technology – Computer Science Engineering (AI & ML)

October 2023 – July 2027

ABES Engineering College, Ghaziabad, Uttar Pradesh

CGPA: 8.33

Senior Secondary (Class XII)

Dehradun Public School (DDPS), India

Completed March 2023

92.8%

Secondary (Class X)

Dehradun Public School (DDPS), India

Completed March 2021

94.8%

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, HTML, CSS

Frameworks: React, Tailwind CSS, Bootstrap

Backend: Node.js, Express (Learning)

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, VS Code, Postman, Google Colab

Core Competencies: Frontend Development, REST APIs, DSA

CERTIFICATIONS & ACHIEVEMENTS

- Infosys Springboard Virtual Internship 6.0 – AI Domain (Certificate of Completion)
- Google AI Fundamentals – Infosys Springboard
- Deloitte Australia Data Analytics Job Simulation – Forage
- More certifications: LinkedIn
- Secured **3rd Position** in Full Stack Development Webathon @ ScholarHat, showcasing strong **React-based frontend** and problem-solving skills.
